

Digital Society Initiative

DSI Mobility Workshop

22 June - 23 June 2023, Hotel RömerTurm in Filzbach,

Switzerland

Workshop overview

Scope: Are you interested in research about the future of mobility? Do you want to connect and establish a research collaboration in this area? The DSI Mobility Community organizes the workshop as a ‘marketplace of ideas’ to support research exchange and collaborations in the area of mobility and digitalization. The main topic of the workshop this year will be “Smart cities and urban analytics” and it includes but is not limited to human mobility, navigation, autonomous vehicles, smart cities, space mobility, etc.

Objectives: This workshop pursues two aims. First, to provide a platform for researchers from different disciplines to connect and present/exchange research ideas in this domain. Second, to develop a preliminary research plan for the ideas accepted for presentation within the focus group discussions.

Programme

Day 1: We will start with a networking dinner on the evening of the arrival day. Optionally, for those who want to arrive earlier, we can organize a hike starting in the early afternoon.

Day 2: The workshop will include two sessions. In the morning session, participants will pitch their research ideas. In the afternoon session, the focus group discussion will be formed to develop a draft research plan for the ideas accepted for presentation. The workshop will end with a wrap-up session to compile a list of ideas and challenges for initiating future research collaborations in the area of smart cities and urban analytics.

Participants

- Researchers of any discipline and seniority.
- PhD students may receive 1 ECTS point for participation.
- All presenters are expected to attend in person. Suitable adjustments will be made if needed, depending on the Covid-19 situation.

Submission guidelines and important dates

Submissions of short (up to max. 1000 words) research ideas should be directly uploaded to the workshop webpage: <https://forms.gle/fhip1ooYZ7Or6ZdM7>

- Deadline for registration and workshop submissions: 1 May, 2023 23:59
- Decisions to authors: 15 May, 2023

- Workshop: 22 June - 23 June, 2023

Registration information

- Participants are required to register for the workshop using the link above.
- The number of participants is limited. Participants who are not invited to pitch their ideas for the morning session will have an opportunity to present them at the poster session during the lunch break.
- The registration fee is 300 CHF and includes accommodation, coffee breaks, meals, and all materials used during the workshop. The travel costs are not included.
- We provide a limited number of travel grants for junior researchers; more information will be provided upon acceptance. In case you want to apply for the travel grant, you will be asked to provide a motivational statement.

Place

The workshop will take place at the Hotel RömerTurm in beautiful Filzbach in Switzerland.
