# MOBILITY CONNECT
## Perspectives on Autonomous Driving

**March 2025** marked a milestone: autonomous driving in Switzerland is now a reality. This shift does not just change how we move; it raises big questions about trust, responsibility, safety, and the role of technology in society.

Join us as our **interdisciplinary panel** brings together perspectives from traffic, business, communication, culture, and law to explore how self-driving cars will transform mobility and what it means for all of us when machines take the wheel.

## Panel Speakers

- **Dr. Wernher Brucks** *Traffic Department, Stadt Zürich*
*Head of Traffic Safety focusing on, among others, road safety and accident analysis and prevention*

- **Sophie Hall** *Automatic Control Laboratory, ETH*
*PhD candidate focusing on game theory and model predictive control*

- **Elif Kuscu** *Business Administration, UZH*
*PhD candidate focusing on Sustainable Operation Management*

- **Prof. Dr. Christine Lotscher** *ISEK, UZH*
*Professor of Popular Literature and Media with a focus on Children's and Youth Media*

- **Dr. Daniela Mahl** *Science Communication, UZH*
*Senior Researcher focusing on the socio-cultural implications of technologies*

- **Dr. Ilia Shilov** *Automatic Control Laboratory, ETH*
*Postoctoral Researcher focusing on automatic control systems , multi-agent systems and game theory*

- **Prof. Dr. Nadine Zurkinden** *Law, UZH*
*Professor of Criminal Law and Criminal Procedure Law*
